The National Network of Partnership Schools (NNPS) invites schools to use research-based approaches to organize and sustain excellent programs of family and community involvement that will increase student success in school. Dunbar MS collaborates and supports the Central-East Cluster Team. Partnership Programs focus on the six “keys to improvement” identified by educational researchers as the critical components of home/school/community connections.

Six Types of Involvement: Keys to Successful Partnerships

1. **Parenting:** Assist families with parenting skills and setting home conditions to support children as students. Also, assist schools to better understand families.
2. **Communicating:** Conduct effective communications from school-to-home and from home-to-school about school programs and student progress.
3. **Volunteering:** Organize volunteers and audiences to support the school and students. Provide volunteer opportunities in various locations and at various times.
4. **Learning at Home:** Involve families with their children on homework and other curriculum-related activities and decisions.
5. **Decisions Making:** Include families as participants in school decisions, and develop parent leaders and representatives.
6. **Collaborating with the Community:** Coordinate resources and services from the community for families, students, and the school, and provide services to the community.
